

Create a programme that manages students enrolments and showing them the course; In it students have to specify by their student ID, and their year-grade. Notice that some courses have limitations, therefore we have to get the course info for which the student has passed. (in a file). At last we need to show the student class in a new file

Students		Course	
Manage all info for 1st grades students	course willingcourse passedcourse	Manage all info for all kind course	willingcourse passedcourse
Year2		WillingCourse	
Manage all info for 2nd grades students		Manage all info for all course student want to register	
Year3		PassedCourse	
Manage all info for 3rd grades students		Manage all info for all course student didn't passed	
Year4		FileOpearation	
Manage all info for 4th grades students		Manage some file read and output	file scanner
Demo			
Showing all courses info of students in one file	Course WillingCourse PassedCourse FileOpearation
